

Installation Instructions

Thank you for ordering your Entergy Mississippi Energy Efficiency Kit for Kids. The instructions below are provided to assist you with the installation of your new efficient-flow showerhead and faucet aerators.

Showerhead

To install your new efficient-flow showerhead, watch the video linked [here](#) or follow the step-by-step instructions below.

You'll need: washer, adjustable wrench, old toothbrush, rag and plumber's tape.

1. Remove the old showerhead by turning it counterclockwise.
2. Using an old toothbrush and rag, clean and dry the threaded area of the shower arm thoroughly.
3. Insert the washer provided into the showerhead to prevent leaks.
4. Attach the new showerhead to the shower arm by turning clockwise – use a wrench if necessary, making no more than a one-quarter turn with a wrench. Use a rag to protect the showerhead's finish. **DO NOT OVER-TIGHTEN.**
5. If you notice any leaks after turning the water on, remove the showerhead, wrap the threads of the shower arm with the plumber's tape provided and reattach.
6. **Enjoy your new efficient-flow showerhead.**

Faucet Aerators

To install your new efficient-flow faucet aerators, watch the video linked [here](#) or follow the step-by-step instructions below.

You'll need: washers, old toothbrush, rag and plumber's tape.

1. Remove the old aerator from the faucet by turning it counterclockwise.
2. Using an old toothbrush and rag, clean and dry the threaded area of the faucet thoroughly.
3. Insert the washers provided into the aerator to prevent leaks.

For internal-threaded faucets: place provided thinner washer on top of the thicker washer on the top of the aerator.

For external-threaded faucets: discard the thicker washer and place the provided thinner washer on the top of the aerator.
4. Attach the new aerator to the faucet by turning clockwise and hand-tighten until snug. **DO NOT OVER-TIGHTEN.**
5. If you notice any leaks after turning the water on, remove the aerator, wrap the threads of the aerator with the plumber's tape provided and reattach.
6. **Enjoy your new efficient faucet aerator.**
